

# Go Green<sup>🌱</sup>

BIZ IN BRIEF | 10.2021

## 3 IRELAND'S GREEN TEAM COMMITS TO REDUCING CARBON EMISSIONS

3 Ireland has joined 60 other domestic and international firms to help the country reach its goal of becoming a net zero carbon state by 2050. The operator has committed to record its direct and indirect emissions, reduce direct emissions, work to minimise supply chain emissions, and to report on its progress in a formal annual report. 3 Ireland formed the Green Team, an internal, cross-department team, to work on these commitments as well as a variety of other initiatives that promote sustainability awareness and action across the company. The Emerald Isle is getting a green boost from 3 Ireland's passionate Green Team!
