5G SPIRITUALITY FOR THE WORLD

3 Hong Kong transported the “Universe in a Flower” to Buddhists around the world using 5G 4K live streaming technology. The majestic music of the Hong Kong Chinese Orchestra, the stunning backdrop of Tsz Shan Monastery and spiritual rituals elevated those joining the concert in their religious observance. 3 Hong Kong also distributed a 3D lotus hologram device so that adherents could project the image and their prayers to the cosmos during the flower-offering ceremony.
