

CK Hutchison Global Climate Action Conference

IMPACT | 01.2023

CK CLIMATE CONFERENCE - 8 TO 10 FEBRUARY 2023

CK Hutchison is taking big steps in empowering the net-zero transition. Join us to learn about the significant steps being taken across the Group's core businesses of Ports, Retail, Telecommunications and Infrastructure to create a greener future.

During the virtual conference you will hear from Executive Directors and business-level CEOs that are setting the tone from the top. You will learn how Ports, Retail and Telecommunications have set - and will achieve - their science-based targets and net-zero commitments. The companies within the Infrastructure division will share the leadership steps they are taking in renewable and other clean energy, developing a circular economy, promoting climate adaptation and protecting biodiversity.

The inaugural conference has been organised Group-wide and we welcome delegates from across the Group. The agenda is available [here](#).

Please sign up [here](#) by February 1 to secure a (limited) spot. Space is limited, priority will be given to CK Hutchison Group colleagues.
