## CKHGT ON TRACK TO NET ZERO

CK Hutchison Group Telecom (CKHGT) received approval of its near-term science-based greenhouse gas emissions reduction targets from the Science Based Targets initiative (SBTi). SBTi is a collaboration between CDP, the United Nations Global Compact, the World Resources Institute (WRI) and the World Wide Fund for Nature (WWF), enabling businesses to set ambitious emissions reductions targets in line with the latest climate science. CKHGT is committed to reducing its carbon footprint through actions such as sourcing more renewable energy, improving energy efficiency and working with suppliers to also reduce their carbon footprint in the supply chain. The process of continuous reduction of the company's carbon output will include mapping out a plan for net-zero status by 2050.
