## HYPER-WINNING WAYS FOR AGIG

The Australian Gas Infrastructure Group (AGIG) has won the 2022 Energy Community Engagement Award at the South Australian 2022 Premier's Awards in Energy and Mining. The accolade was given for the success of the engagement programme surrounding its Hydrogen Park South Australia project. AGIG co-designed the programme with the community, as the residents of Mitchell Park became the first in Australia to receive a hydrogen-natural gas blend into their homes. Schools and businesses in nearby suburbs will be the next to benefit from a blended solution when the project expands later in 2023.
